

Bucks County Community College

Charge to the Sustainability Working Group

Provide a forum for all members of the campus community to share their perspectives and ideas regarding sustainability efforts.

Promote sustainability efforts within the College community and the College's societal responsibility as an environmental steward.

Review and benchmark work done by peers in the higher education community.

Study carbon footprint issues, products, processes and actions to identify the changes that can positively impact sustainability while maintaining the mission of the College.

Recommend to the Deans Council cost effective solutions by which the College can meet environmental standards.

Identify short and long term goals to facilitate tracking progress.

Propose a broad sustainability policy for general adoption by the Trustees and specific operating policies/practices to be implemented by administration, students and staff groups.
