**Adding a Printer to your Mac**

1. Click on the **System Preferences** icon on the dock at the bottom of your screen.

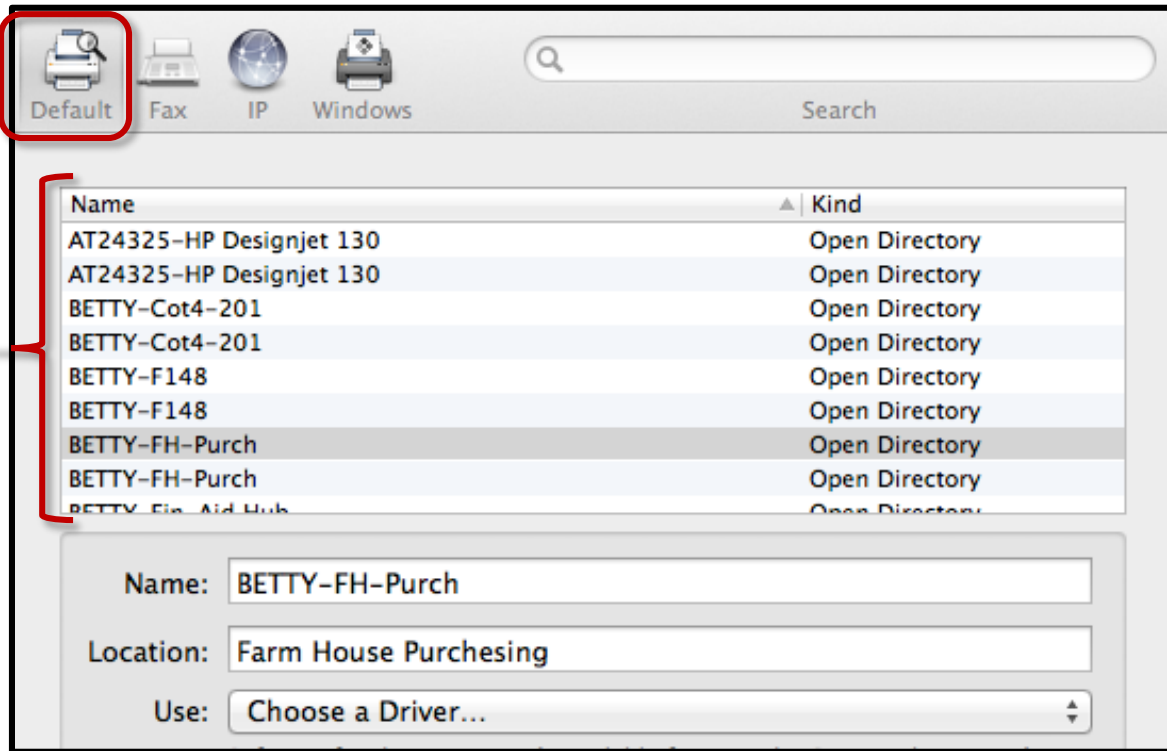

2. Click **Printers & Scanners**.

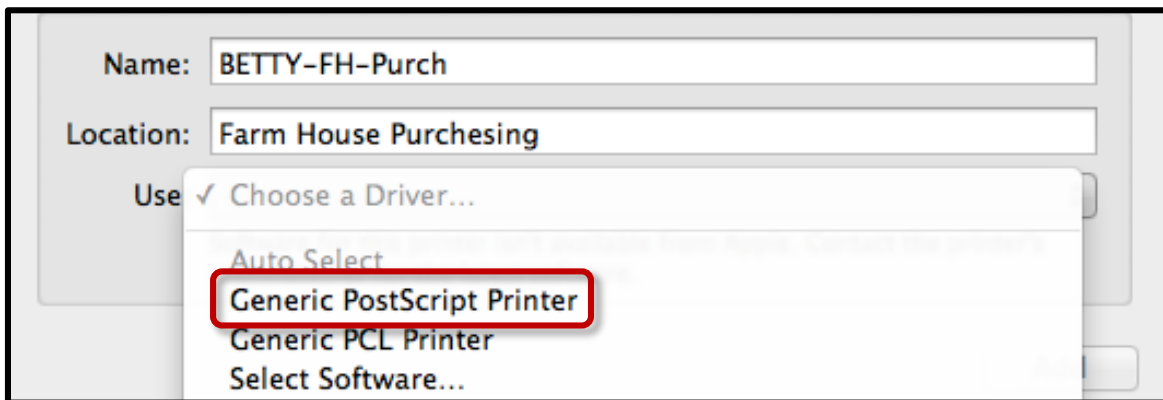

3. A window will appear with a list of current printers that are installed. Click the [+] icon to install a new printer.

4. In the Add Printer window, the **Default** tab will display shared and networked printers. On the list of available printers, find the printer you wish to add and select it.

5. In the **Use: Choose a Driver** drop down menu, select the **Generic PostScript Printer** option.

6. After the drivers are installed, click the **Add** button. The printer should be successfully installed.
