Creating and Uploading Video in Canvas - iPhone

1. Click on the discussion you want to contribute to and follow the instructions in the images.

2. If there are already discussion posts, it may take a few moments for the discussion to load.

Click on the discussion you want to contribute to.

Tap the Reply Arrow to start the process of recording a video.
3.

4.

5. Make sure your camera is facing you and not outwards.
6. 

As you are recording, the recording button will look like this.

7. 

Check your video by clicking on the start arrow. If it is not what you want, retake it, otherwise tap on Use Video.

8. 

Once you create and choose your video, your video is waiting to be posted. You need to click ‘Post’ to post it to the discussion.
9. Regina Hierholzer

This is what your video should look like in the discussion for everyone to view.

10. You will know your video is posted because you will get this message.
