INSTITUTIONAL RESEARCH DATA

Employment

Each year, Bucks County Community College conducts an annual survey of students who graduated in the previous year. The following data are results from the survey of 2009 graduates and are based on those students who responded.

- More than three-fourths (76%) of the 2009 survey respondents report that they are employed (45% full-time, 31% part-time).
- More than half of those who are employed (52%), are employed in fields related to their programs of study at Bucks.
- Of those graduates who reported that they are not working, 80% transferred to another educational institution to continue their studies.
