2015/16	24	19	79%
2014/15	11	12	92%
2013/14	15	15	100%

The American Registry of Radiologic Technologists (ARRT) is the organization that nationally certifies students as Radiologic Technologist. Employers, state licensing agencies, and federal regulators look at the ARRT credential as an indication that a person has met a recognized national standard for medical imaging.

The candidates for ARRT's Radiography certification and registration must meet basic education, ethics, and examination requirements to become eligible. ARRT's Radiography examination assesses the knowledge and cognitive skills underlying the intelligent performance of the tasks typically required of staff technologists practicing at entry-level within the discipline. Applications for the exam can be obtained through individual program directors, once successful completion of the Radiography Program has been completed. The examination requires a minimum score of 75% to become certified as a Radiologic Technologist.
