

Completion, Graduation and Transfer-out Rate Trends (150%) and Disaggregated Rates Fall 2015 Cohort

Completion/Transfer Rates

The following tables present the completion and transfer rates for those first-time, full-time students at Bucks County Community College who began their studies in the Fall 2015 term, and either completed or transferred within 150% of the “normal time” for completion. If students changed their status from full-time to part-time during this time period, they are still tracked for progress towards completion and are included in the percentages provided below.

The **completion** rate tracks those students from the initial cohort who completed a certificate or associate’s degree within 150% of the normal time to completion. The **transfer** rate tracks those students who transferred to another postsecondary institution during this same time frame. Since a majority of Bucks students (approximately 70% in the Fall 2015 class) indicate that a primary educational goal is to transfer to another college to complete their bachelor’s degree, this rate along with the completion rate provides a larger picture of the progress students are making towards their stated educational goals.

Note that these rates do not account for all students enrolled at the college. Students who attended another postsecondary institution prior to attending Bucks, or students who attended part-time are not included in these figures.
